

B2 Token

B2 Token (B2T) is a fully deflationary utility token deployed on BNB Smart Chain. Inspired by the iconic B-2 Spirit, it combines simplicity and strength to build a community-driven ecosystem.

With a fixed supply of 21 million tokens and no minting, B2T incentivizes long-term holding and reduces circulating supply over time through a built-in 1% burn on every transfer. There is no transaction tax, ensuring frictionless trading and maximum investor confidence.

Overview

- Max supply: 21,000,000 B2
- Tax: 0% (No transaction tax)
- Burn: 1% on every transfer
- Chain: BNB Smart Chain (BEP20)
- Contract address: 0x67A804abb2a46ca1699fe2E72081B92888d64dA9
- No minting: Fixed supply, no additional tokens can ever be minted

Official Wallets

- Deployer: 0xc1eeba5f1d4cf00b7871a05663B890cf2C10a187
- Vault: 0x1b6e2676911F40B7754572A166A54cB2Cbb5d72e (Reserved for future liquidity additions, potential partnerships, and emergency funding)
- Founder Reserve: 0x56Cd9120B63c9a07e45Fd2ef6729BA447c85Ed74 (Set aside as a long-term incentive for project growth and alignment)

Roadmap

- Phase 1: Token creation, contract verification, and initial liquidity pool setup
- Phase 2: Public website and documentation
- Phase 3: Expand community & marketing
- Phase 4: Listing on token trackers (e.g., CoinGecko, CoinMarketCap)
- Phase 5: Evaluate further development opportunities and DApp integrations
